CERTIFICATIONS

- AWS Certified Solutions Architect – Professional
- AWS Certified Security – Specialty
- AWS Certified Solutions Architect – Associate
- AWS Certified Cloud Practitioner
- AWS Certification SME – Associate
  Contributor to AWS Certification exam development
- AWS Partner: Technical Accredited

All badges verifiable on Credly — credly.com/users/raffasolaries

CORE SKILLS

Governance & Landing Zones

AWS Control Tower · Organizations & SCPs · Multi-account design · IAM Identity Center & permission sets · AWS Config · Security Hub · Well-Architected reviews

Identity

SAML 2.0 · OpenID Connect · Federation with Entra ID & Google Workspace · Google Workspace administration · Cognito OAuth 2.0

PROFILE

Principal cloud architect and founder of **Kumokage GmbH**, Zürich: **10+ years** in software engineering, **7+ on AWS**, **four AWS certifications** (Solutions Architect Professional, Security Specialty) and AWS Certification SME, contributing to AWS exam development. I own architecture end-to-end — landing zones, zero-trust identity and networking, Kubernetes platforms, multi-region DR and agentic AI platforms on Amazon Bedrock — for a European institution, Volkswagen, a global gaming publisher, an FCA-regulated fintech, public-sector utilities and IoT. **Available for contract and fractional principal-architect mandates in Switzerland and across Europe.**

- **Edge migration at scale** — moved seven production zones of live game titles from Cloudflare to CloudFront, WAFv2 and Shield Advanced, on budget.
- **Resilience proven, not assumed** — designed multi-region DR for EKS, Aurora and Valkey as one parameter-driven workflow and validated it in a live failover drill.
- **AI-native engineering** — shipped an agentic developer platform on Bedrock AgentCore that gates GitLab merge requests across eleven AWS accounts via credential-less OIDC.
- **Compliance with a payback** — 7-year S3 Object Lock email archive for a regulated fintech that also cut licensing ≈51% (~$12k/yr).

EXPERIENCE

Founder & Principal Cloud Solutions Architect

Oct 2026 – present
Zürich, Switzerland

Kumokage GmbH · Managing Director · Cloud architecture & security consultancy

- Founded a Zürich consultancy that designs, secures and runs cloud platforms with a focus on AWS, and lead every engagement as the accountable principal architect: landing zones, security & compliance, EKS platforms and multi-region DR, governed AI on Amazon Bedrock.

Principal Cloud Solutions Architect & Founder

Jan 2025 – present
Remote

Aspect Solutions, Unipessoal Lda · Independent consultancy, Portugal

- Enterprise AWS architecture, security and DevOps for international clients in gaming, fintech, automotive, cybersecurity and IoT, including an AI-native developer platform on Bedrock AgentCore — see Selected Engagements below.

Cloud Architect

Sep 2023 – Jan 2024
Remote

PwC Luxembourg · Contractor for a European Institution

- Designed the institution-wide centralised backup strategy on AWS Backup, aligned to the AWS Data Protection Reference Architecture.
- Rolled out automated EC2 patching and org-wide CloudFormation StackSets.
- Built S3-triggered automation keeping AWS Network Firewall rules current against malicious domains and IPs.
- Led remediation of publicly exposed EC2 and RDS resources from Security Hub and Config findings; advised account owners on re-architecture.

Stack: AWS Backup · Network Firewall · Security Hub · Config · CloudFormation StackSets · Systems Manager

Networking & Security
Transit Gateway · Cloud WAN · Direct Connect · Site-to-site VPN · Hub-and-spoke VPC · Network Firewall & Suricata · CloudFront edge · AWS WAFv2 · Shield Advanced · KMS · Secrets Manager · S3 Object Lock (WORM) compliance archives · SPF / DKIM / DMARC · incident response · Route 53 hybrid DNS

Infrastructure as Code
CloudFormation & StackSets · AWS CDK · Terraform · Copilot CLI

Containers & Compute
EKS (multi-tenant, in-place upgrades) · ECS Fargate · Karpenter · ArgoCD GitOps · NGINX ingress · Lambda · EC2 & AMI lifecycle

AI Platforms
Amazon Bedrock AgentCore · agentic workflows · RAG with cited sources · Lambda / EventBridge event-driven agents

CI/CD
GitLab CI · GitHub Actions · Bitbucket · AWS CodeCatalyst · OIDC credential-less pipelines

Data & APIs
AppSync GraphQL · API Gateway · Amazon Aurora · RDS PostgreSQL · DocumentDB · DynamoDB · OpenSearch · ElastiCache / Valkey · Amazon MQ (RabbitMQ)

Resilience & Observability
Multi-region disaster recovery · AWS Backup · cross-region replication · CloudWatch · Managed Grafana · Sentry

Cloud Solutions Architect
Feb 2023 – Jun 2023
Lisbon, Portugal

Volkswagen Digital Solutions

- Delivered secure AWS accounts inside the MAN-compliant Group landing zone; automated provisioning with Step Functions.
- Event-driven architecture with CDK and StackSets; cross-account roles and trust policies; Route 53 hybrid resolver shared via RAM.
- Operated multi-account security tooling — DevOps Guru, Security Hub, custom Config rules — over Direct Connect and Transit Gateway.

Stack: AWS CDK · Step Functions · Transit Gateway · Direct Connect · GitLab CI · Python

Solutions Architect
Oct 2021 – Feb 2023
Assago, Italy

ITnet Srl

- Guided mid-market and enterprise clients through cloud adoption and hybrid operations; designed Control Tower landing zones with IAM integration.
- Led post-disaster-recovery infrastructure redesign.
- Integrated ServiceNow ITSM, CMDB and ITOM with AWS Service Catalog.
- Assessed Azure SAP estate for AWS migration; migrated Jira Server to Jira Cloud.

Stack: Control Tower · Service Catalog · ServiceNow · Azure · Active Directory · Docker

AWS DevOps Engineer
Jun 2019 – Oct 2021
Milan, Italy

Tantosvago Società Benefit

- Introduced Git Flow; built CI/CD for ECS workloads and CloudFront + S3 static sites.
- Integrated partner REST APIs with mTLS via API Gateway Lambda proxy; custom SSO with Lambda authorizer, ElastiCache and DynamoDB.
- Containerised Laravel applications on ECS Fargate behind NGINX with CloudWatch monitoring.

Stack: ECS Fargate · API Gateway · Lambda · DynamoDB · ElastiCache · PHP · Node.js · React

Full Stack Engineer
Apr 2018 – Dec 2018
Milan, Italy

Key Partner Digital

- Led a multi-platform chatbot framework on AWS Lex and Claudia.js; Angular 2+ front-ends.

CEO & Lead Engineer
Jan 2015 – Mar 2018
Giovinazzo, Italy

Memories IT Company

- Delivered web platforms for marketplace, booking, hospitality, insurance, car-rental and forex clients; Stripe and Google Maps / what3words integrations.

Stack: Angular 2+ · Vue.js · Yii2 · Magento · WordPress · Joomla · D3.js

SELECTED ENGAGEMENTS

AWS Platform Engineering & Edge Migration — Global Mobile Gaming
Mar 2026 – present

Via a consulting partner — end client: a globally known mobile & web gaming publisher

Principal architect owning the Terraform platform behind three live game titles — multiple accounts, six EKS and eleven Aurora clusters. Migrated seven production zones from Cloudflare to CloudFront, WAFv2 and Shield Advanced on budget (custom WAF rule sets, Origin Shield). Designed multi-region DR for EKS, Aurora, Valkey and CI/CD as one parameter-driven workflow, validated in a live failover drill. Delivered Amazon MQ (RabbitMQ) 3.13→4.2, AWS Backup PITR on all production Aurora clusters, EKS 1.35 with node auto-repair and Karpenter, Security Hub FSBP and centralised Secrets Manager. Defined least-privilege boundaries for accounts co-managed with client teams. Everything shipped via ServiceNow change management and peer-reviewed, plan-gated CI; ran a CloudFront/WAF workshop for 12 engineers.

Delivery Governance
ServiceNow change management · peer-reviewed PRs · plan-gated CI · design docs as code

Platforms & Languages
Azure · Linux · Docker · Python · TypeScript/Node.js · PHP · SQL

EDUCATION

MSc Computer Engineering
Università degli Studi di Verona
LM-32 Ingegneria e Scienze Informatiche · Visual Computing curriculum · 2008 – 2014

BSc Computer Science
Università degli Studi di Perugia
Class 26 · Informatica · 2003 – 2008

State Qualification, Software Engineering
Università di Camerino
2014

AI-Native Internal Developer Platform & Engineering Modernisation
Jul 2025 – present

Global IoT positioning & wireless semiconductor company — via a UK engineering-staffing partner

Led the architecture and hands-on delivery of an agentic internal developer platform on Amazon Bedrock AgentCore, Lambda, EventBridge and DynamoDB with a React dashboard and Cognito / Entra ID SSO. Delivered repo-discovery, architecture-compliance and RAG agents that gate GitLab merge requests and answer engineering questions with cited sources, released to dev/staging/prod through credential-less GitLab OIDC CI. Rolled out cross-account OIDC deploy roles (AWS CDK) across eleven accounts; remediated all AWS Security Agent High/Medium findings. Architected HA self-managed GitLab on AWS with Entra ID SSO, migrated GitHub and SVN repositories with full history (119k-commit pilot) and re-platformed the company wiki on AWS serverless.

Cloud Platform, Compliance Archive & Security Operations — Regulated Fintech
Aug 2023 – present

FCA-regulated fintech group

Long-standing cloud architect and de-facto head of IT security. Built the AWS foundation — Control Tower with Security Hub, Google Workspace SAML SSO into IAM Identity Center, GitLab OIDC CI/CD, ECS microservices streaming real-time market data over WebSockets, AppSync GraphQL and Managed Grafana. Delivered an immutable email-compliance archive (Gmail journaling → S3 Object Lock, 7-year retention, KMS) and archived 218k messages from 97 dormant identities, cutting licensing ~$12k/year (≈51%). Led response to a P1 brand-impersonation BEC attack — containment, registrar takedowns, FCA disclosure assessment — then hardened SPF/DKIM/DMARC on ten domains. Migrated Microsoft 365 → Google Workspace with an atomic MX cutover; provisioned a governed AI-Services account with org-wide Bedrock access; designed US multi-region HA replication; decommissioned 73 legacy resources.

Landing Zone & Multi-Tenant Kubernetes Platform — Public-Sector Gas Distribution
Jan 2024 – Dec 2025

ReeVo Cloud & Cyber Security — public-sector gas distribution end client

Control Tower + Security Hub + IAM Identity Center federated with Entra ID; hub-and-spoke Transit Gateway with Direct Connect and VPN failover; Network Firewall with Suricata rule sets. Multi-tenant EKS with namespace isolation, ArgoCD GitOps, Karpenter and NGINX ingress. Terraform observability modules across RDS, DocumentDB, ECS/EKS, CloudFront, WAFv2 and ALB/NLB. Private NLB → API Gateway → CloudFront delivery with WAF, Cognito OAuth 2.0 and KMS; CI/CD on CodeCatalyst.

AWS Infrastructure Modernisation — Connected Vehicle Platform
Jan 2025 – Feb 2025

AWAKE Mobility — automotive IoT

Prod/Dev/QA multi-account architecture aligned to the Well-Architected Framework; Entra ID SSO with least-privilege permission sets; VPC segmentation and Network Firewall; Bitbucket ↔ IAM Identity Center credential-free CI/CD; AWS Backup with cross-region replication; CloudWatch, Uptime Kuma and Sentry monitoring; CloudFormation and Terraform IaC; SNS/SQS/Lambda event-driven guidance.
