EDUCATION

Università degli Studi di Verona 🔗 <i>MSc in Software Engineering - Visual Computing</i> LM-32 - INGEGNERIA INFORMATICA 🔗	10/2008 – 07/2014 Verona, Italy
Università degli Studi di Perugia 🔗 <i>BSc in Computer Science</i> 26 - SCIENZE E TECNOLOGIE INFORMATICHE 🔗	10/2004 – 02/2008 Perugia, Italy

PROFESSIONAL EXPERIENCE

ASPECT SOLUTIONS, UNIPESOAL LDA 🔗 <i>Principal Cloud Solutions Architect and Founder</i> Independent consultancy delivering enterprise-grade AWS and Azure cloud architecture, security, and DevOps solutions to international clients across fintech, automotive, cybersecurity, and IoT sectors.	01/2025 – Present Remote
PwC Luxembourg 🔗 <i>Cloud Architect</i> - Developed a centralized backup strategy for a European Institution with AWS Backup, significantly improving data protection according to the AWS Data Protection Reference Architecture. - Implemented an automated patching solution for EC2 instances and streamlined updates across the organization through CloudFormation stacksets. - Established a real-time automation system for AWS Network Firewall rules, updating firewall protections against malicious domains/IPs via S3-triggered automation. - Directed efforts to secure EC2 instances and RDS databases from exposed public IPs by using AWS Security Hub and AWS Config, enhancing overall network security. - Offered strategic advice to account owners on addressing security risks and redesigning workloads for a better security posture. - Skills include: Network Security, Infrastructure as Code (IaC), AWS CloudFormation, Amazon Web Services (AWS), Data Backup Solutions, AWS Security Hub, Security Automation.	09/2023 – 01/2024 Remote

Volkswagen Digital Solutions

Cloud Solutions Architect

02/2023 – 06/2023

Lisbon, Portugal

- Thrived in a dynamic Agile setup, ensuring the secure deployment of AWS accounts within a compliant MAN AWS Landing Zone framework. Adept at orchestrating GitLab CI/CD pipelines, overseeing kanban boards, and fine-tuning project setups for maximum efficiency.
- Demonstrated proficiency in AWS CDK and CloudFormation StackSets, crafting event-driven architecture solutions that enhance operational functionality. Possess deep understanding in setting up cross-account access with meticulously defined policies, roles, and trust frameworks.
- Automated the AWS account provisioning process using Step Functions, streamlining operations and enhancing productivity. Leveraged Route 53 Hybrid Resolver through RAM for efficient domain name resolution, ensuring seamless connectivity across accounts.
- Displayed expertise in fortifying AWS ecosystems, utilizing cutting-edge security services (DevOps Guru, Security Hub) and crafting custom AWS Config rules for robust defense mechanisms. Also skilled in optimizing network infrastructures using Direct Connect and Transit Gateway for improved network reliability and performance.
- Actively participated in knowledge sharing sessions, including tech talks and presentations, to disseminate valuable insights and best practices with colleagues and management alike, fostering a culture of continuous learning and improvement.
- Skills: Proficient in Amazon Web Services (AWS), adept with DevOps methodologies, and have a strong background in Python programming, enabling the development of scalable, secure, and efficient solutions.

ITnet srl

Solutions Architect

10/2021 – 02/2023

Assago, Italy

- Expert in cloud adoption, data automation, and hybrid architecture management, assisting a range of medium-sized to large corporations.
- Proficient in creating AWS Control Tower Landing Zones for enhanced governance and compliance, alongside integrating comprehensive identity and access management systems.
- Demonstrated capability in leading extensive infrastructure redesign efforts, particularly in post-disaster recovery scenarios, ensuring resilient architectural solutions.
- Deep expertise in process orchestration and automation, including integration of ServiceNow ITSM, CMDB, and ITOM with AWS Service Catalog products for streamlined operations.
- Conducted detailed analyses of Azure SAP architecture for effective migration planning to AWS, and successfully managed the migration and configuration of Jira Server to Jira Cloud.
- Technical Skills: Proficient in Linux, Amazon Web Services (AWS), SQL, Docker, Microservices, Microsoft Azure, and Active Directory.

Tantosvago Società Benefit *AWS DevOps Engineer*

06/2019 – 10/2021

Milan, Italy

- Implemented Git Flow versioning, enhancing collaboration and code management, which led to more efficient workflows and increased productivity.
- Deployed CI/CD pipelines for ECS workloads and static websites, leveraging CloudFront CDN and S3 for improved deployment processes.
- Integrated AmazonLibri REST APIs using AWS API Gateway Lambda Proxy with mTLS authentication, ensuring secure and reliable API interactions.
- Developed custom SSO solutions with AWS API Gateway Lambda Proxy and Lambda Authorizer, supported by ElastiCache and DynamoDB, enhancing system access security and efficiency.
- Refactored Laravel applications into Docker containers using NGINX and AWS ECS Fargate, boosting app performance and scalability.
- Maintained system stability and security with comprehensive CloudWatch monitoring, ensuring high system reliability.
- Skills include PHP, React.js, AWS, JavaScript, Docker, Node.js, and Microservices, demonstrating a broad and adaptable technical proficiency.

Key Partner Digital *Full Stack Engineer*

04/2018 – 12/2018

Milan, Italy

- Led the development of a versatile chatbot framework across multiple platforms, utilizing AWS Claudia.js and LEX, which included architecting its structure and monitoring its performance with CloudWatch.
- Contributed to the creation of engaging user interfaces as part of front-end development efforts using Angular 2+, enhancing overall user experience.
- Gained comprehensive experience in chatbot technologies and front-end development, expanding my expertise as a full-stack engineer.

Memories IT Company *CEO*

06/2015 – 03/2018

Giovinazzo, Italy

Oversaw the creation and enhancement of a broad range of web applications, ensuring both innovation and functionality were at the forefront. These included:

- A cutting-edge social marketplace platform, crafted using Oxwall and Magento frameworks.
- A convenient shore sunshade booking platform, developed with the Yii2 framework.
- A dynamic architects blog, brought to life with Vue.js.
- Several Angular 2+ applications designed for hotel web check-ins, facilitating insurance purchases, and streamlining car rentals.
- Successfully integrated crucial payment systems such as Stripe and location services, including Google Maps JavaScript API coupled with What3Words coordinates, enhancing user experience and operational efficiency.
- Developed and launched WordPress websites tailored to the unique needs of medium to corporate level businesses.
- A Web Forex platform constructed using Joomla and D3.js, highlighting a strong ability in handling diverse web technologies.

This diverse portfolio not only showcases a profound ability in web development but also highlights versatility in managing projects and integrating platforms across a variety of business sectors.

Francesco Lombardo 
Full Stack Engineer

01/2015 – 06/2015
Remote

- Developed and refined the Forex Web Platform, leveraging expertise in PHP, JavaScript, MySQL, HTML, and CodeIgniter to enhance functionality and user experience.
- Proficient in a wide range of technical skills, including PHP Frameworks, MySQL, HTML5, XML, and CodeIgniter, to deliver high-quality web development projects.

SKILLS		
• AWS Control Tower	• AWS Security Hub	• IAM Identity Center
• Azure Entra ID Integration	• Hub-and-Spoke VPC Network	• AWS Transit Gateway
• AWS Cloud WAN	• Hybrid Connectivity Strategy	• AWS Direct Connect
• AWS Network Firewall	• Suricata Rule Sets	• Multi-Tenant EKS Clusters
• GitOps via ArgoCD	• AWS CodeCatalyst	• CI/CD Automation with GitLab
• SAML 2.0 Single Sign-On	• OpenID Connect	• AWS ECS with CloudFormation
• GraphQL APIs with AWS AppSync	• AWS Managed Grafana	• Terraform IaC
• AWS CloudFormation	• AWS CDK	• AWS Backup
• AWS Config	• EC2 Instance Management	• AWS Well-Architected Framework
• Multi-Account AWS Setup	• Federated Authentication	• IAM Permission Sets
• VPC Configuration	• CI/CD Pipeline Optimization	• Disaster Recovery Planning
• CloudWatch Monitoring	• Route 53 Configuration	• CloudFront Distribution
• AWS Lambda	• S3 Bucket Management	

PROJECTS

Self-Managed GitLab Platform & Enterprise Wiki Migration

07/2025 – Present

Client: u-blox AG

Delivering DevOps infrastructure and collaboration platform modernization for a global leader in IoT positioning and wireless communication technology serving automotive, industrial, and consumer markets. Architected and deployed a highly available, self-managed GitLab platform on AWS using CloudFormation, engineered for 500+ users with enterprise-grade security posture. Implemented federated authentication integrating Azure AD with GitLab SSO for seamless identity management. Led repository migration initiatives, successfully consolidating version control by migrating multiple repositories from GitHub.com  and legacy SVN systems into the new self-managed GitLab instance, ensuring full history preservation and minimal disruption to development workflows. Collaborated within a five-person team to rearchitect and develop a new company-wide Wiki platform, leveraging AWS serverless technologies for scalability, cost efficiency, and global distribution.

AWS Multi-Account Platform & Real-Time Financial Data Infrastructure

08/2023 – Present

Client: UCapital24 Fintech Group

Architected and implemented a secure, scalable AWS infrastructure for a fintech platform delivering real-time financial market data services. Orchestrated CI/CD automation using GitLab with OpenID Connect federation for zero-trust credential issuance. Established AWS Control Tower Landing Zone with Security Hub integration and SAML 2.0 SSO from Google Workspace to AWS IAM Identity Center. Designed containerized microservices on AWS ECS using CloudFormation and AWS Copilot CLI, enabling real-time market data streaming via WebSocket services. Built high-performance web application infrastructure with CloudFront, S3, and Cognito authentication, provisioned through Terraform pipelines. Developed GraphQL APIs with AWS AppSync, established centralized observability via AWS Managed Grafana with GitOps dashboard management, and implemented SharedServices account architecture with cross-account least-privilege access. Managed Amazon OpenSearch, DocumentDB, and RDS PostgreSQL with optimized configurations for backup, scalability, and security.

AWS Landing Zone & Multi-Tenant Kubernetes Platform for Public Sector Gas Distribution

01/2024 – 12/2025

Client: ReeVo Cloud & Cyber Security

Designed and delivered a comprehensive AWS cloud infrastructure for a public sector gas distribution company, encompassing security, networking, container orchestration, and observability. Key deliverables included AWS Control Tower Landing Zone integrated with Security Hub and IAM Identity Center (federated with Azure Entra ID), Hub-and-Spoke VPC architecture using Transit Gateway, hybrid connectivity via Direct Connect with site-to-site VPN failover, and AWS Network Firewall with Suricata rule sets. Implemented multi-tenant Amazon EKS clusters with namespace isolation, GitOps via ArgoCD, Karpenter autoscaling, and NGINX ingress controllers. Developed Terraform modules for resource-specific CloudWatch metrics and alarms across RDS, DocumentDB, ECS/EKS services, CloudFront, WAFv2, and ALB/NLB. Established ArgoCD repositories for environment-specific container deployments following best practices. Engineered secure application delivery with private NLB-to-API Gateway integration and CloudFront CDN, secured with AWS WAF, Cognito OAuth 2.0, and KMS encryption. Modernized CI/CD with AWS CodeCatalyst.

AWS Infrastructure Modernization for Connected Vehicle Platform

01/2025 – 02/2025

Client: AWAKE Mobility

Led a comprehensive AWS infrastructure modernization initiative for a connected vehicle platform managing thousands of automotive assets, focusing on scalability, security, and cost optimization. Developed multi-account AWS architecture with Production, Development, and QA environment separation aligned with the AWS Well-Architected Framework. Established federated authentication with Microsoft Entra ID SSO and implemented least-privilege IAM permission sets across all accounts. Designed secure network architecture with VPC segmentation and AWS Network Firewall for enhanced perimeter security. Integrated BitBucket with AWS IAM Identity Center for credential-free CI/CD workflows. Deployed comprehensive backup strategy using AWS Backup with cross-region replication. Implemented multi-layer monitoring using CloudWatch, UptimeKuma, and Sentry. Delivered Infrastructure as Code using CloudFormation and Terraform, optimized EC2 deployments with improved AMI management, and provided architectural guidance on event-driven patterns using SNS/SQS and Lambda.

Segmentation with Active Contours Algorithm of a retina TAC scan

05/2014 – 08/2014

Implemented with MATLAB and its image processing libraries a procedure to segment the vein network of an eye TAC scan

Articles' Authors Recognition

05/2013 – 10/2013

Designed and Implemented an Algorithm which recognizes Articles' Authors using Databases of Authors and Articles and the Fisher's dimensionality reduction methods with Matlab and calculus libraries.

Teleoperation with Novint Falcon joystick

10/2012 – 01/2013

Teleoperation Project: Designed and implemented a robot handler built with LEGO controlled by a game joystick (Novint Falcon) to simulate a part of a surgery robot with cost efficient tools. Robot Operative System programming, C++ and libraries

High School students reports

09/2007 – 10/2007

MySQL & PHP

Database software project: Designed and implemented a platform for "Web Management of Scholastic Achievement in High Schools" in PHP, MySQL and Apache TOMCAT

Virtual reality bar programming in VRML

06/2007 – 10/2007

Designed and implemented a "Virtual Bar with Interactive Games" in VRML language
